

The new VX-Freedom delivers the legendary Leupold performance and dependability hunters and shooters have demanded for decades, combined with a host of new and improved features. VX-Freedom is guaranteed to get the job done every time.

ELITE OPTICAL PERFORMANCE

- 3:1 Zoom ratio
- 1" Maintube
- Ergonomic Power Selector
- Twilight Light Management System
 - Low light performance
 - Increased contrast
 - Glare reduction

RUGGED RELIABILITY

- Scratch resistant lenses
- New easy-to-read, high contrast adjustment markings
- Lightweight and compact
- Extreme recoil tested
- Waterproof and fogproof

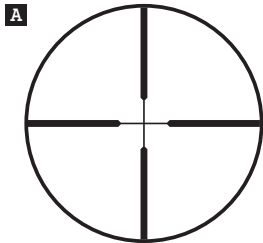

AVAILABLE ACCESSORIES

- Wide assortment of bases and rings
- Alumina lens covers and lens shades
- Fix-It Sticks
- LensPen
- Scope cover

AVAILABLE RETICLES

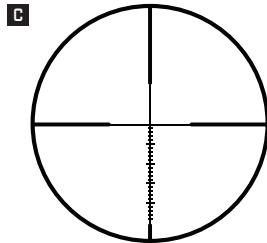

Duplex

- Invented in 1962 by Leupold
- Defined by heavy posts
- Stands out against cover in low light
- Quick target acquisition with thinner center
- Most popular reticle in the world

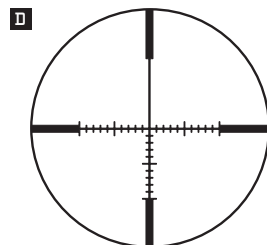

Pig-Plex

- Simplified design
- Aggressive post design for quick target acquisition
- Holdover points out to 600 yards
- Bracketing features specifically for measuring pigs

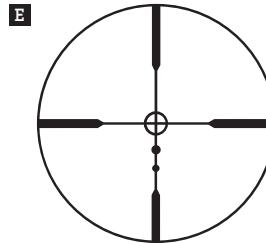

Rimfire-MOA

- Features hash marks at 1 Minute of Angle (MOA) increments
- Designed specifically for rimfire cartridges
- Provides a larger amount of precise reference points for rimfire ballistics
- Leaves upper section clear for observation and spotting

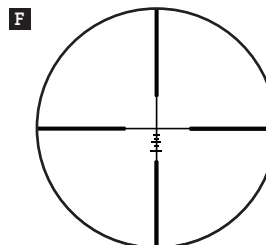

Tri-MOA

- Features hash marks at 1 Minute of Angle (MOA) increments
- Compatible with any caliber
- Provides precise reference points for quick shots

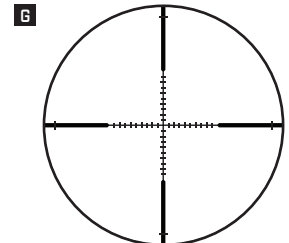

UltimateSlam

- Builds on the Leupold Duplex Reticle
- Tailored to muzzleloaders and shotguns
- Utilizes a 100 yard zero
- Accurate aiming points out to 300 yards
- Marks on the power selector help users tune the reticle for their specific load
- Non-caliber specific

AR-Ballistic

- Designed with input from top competition shooters
- .223/5.56 and .308/7.62 compatible
- Bullet Drop Compensation (BDC) out to 600 yards

TMR

- Expands on existing Mil Dot reticle design
- Utilizes hash marks instead of dots for increased ranging and hold-over precision
- Provides aiming points for both wind and bullet drop compensation
- 1 MIL is approximately 3.6 inches at 100 yards
- Hash marks are spaced .5 MILs apart, transitioning to .2 MIL spacing on the outer edges
- Non-caliber specific
- Intended to be used on highest magnification in a rear or 2nd focal plane scope
- Mil based systems are the current military standard
